

Announcement

"Computer Science and Statistics: Fifth Annual Symposium on the Interface," will be held November 1-2, 1971 at Oklahoma State University, Stillwater, Oklahoma. The two-day meeting will be open to all those who are interested in the relationships between computer science and statistics. The keynote speaker will be H. O. Hartley of Texas A & M University. Concurrent workshops will be conducted in five areas:

- (a) Time Series and Stochastic Processes—Emanuel Parzen, State University of New York, Buffalo, chairman.
- (b) Decision Sciences—Dennis Grawoig, Georgia State University, Atlanta, chairman.
- (c) Compumetrics—Robert Gordon, University of California, Irvine, chairman.
- (d) Computer Science and Statistics in Higher Education: J. L. Folks, Oklahoma State University; and Ron Mohler, University of Oklahoma, co-chairman.
- (e) Computer Science and Statistics in the Extractive Industries.

Persons having papers in any of these five areas (up to about eight pages) are invited to submit them to the conference chairman, Dr. Mitchell O. Locks, Oklahoma State University, Stillwater, Oklahoma, 74074, to be considered for presentation and for possible incorporation into the proceedings. For this purpose, a complete paper is preferable to an abstract. Likewise, anyone who may wish to receive the conference brochure when it is issued may notify the chairman of his interest.

This national conference is being held under the joint co-sponsorship of Oklahoma State University, the University of Oklahoma, North Texas State University, University of Tulsa, and certain industrial firms in the mid-continent region. The four previous meetings were all held in southern California, under the joint sponsorship of the Southern California Chapter of the American Statistical Association, the Los Angeles chapter of the Association for Computing Machinery, and the Statistical Program Evaluation Committee—and were hosted by UCLA and the University of California, Irvine. The sixth (1972) meeting in this series will be held at Berkeley, California.
